Print Material - material: Photo paper, print: Pigment Print, size: 2.25inches (H) x 8.5inches (W)

Single-Use Plastics and the Environment

The Philippines generates **2.7 million tons of plastic waste per year.**

Source: World Bank

It is the world's third largest contributor to mismanaged plastic wastes, with an estimated **0.75 million tons** of plastic entering the ocean each year.

Plastic straws can take up to 200 years to decompose.

Source: WWF Australia

During this period, straws will gradually break down into smaller particles known as **microplastics**, which are present in almost all water systems in the world.

Plastic wastes ending up in oceans are harmful to marine life.

Source: Sea Turtle Conservancy

Over 1 million marine animals are killed each year due to plastic pollution in the ocean. Turtles often mistake plastic for food, while fish ingest microplastics unintentionally.

#REFUSE SingleUse
Be the solution to plastic pollution!

By refusing single-use plastics, you are doing your part in helping reduce the amount of plastic wastes that find their way to the environment.
