**Single-Use
 Plastics and the
 Environment**

**The Philippines
 generates 2.7
 million tons of
 plastic waste
 per year.**

Source: UNEP
 It is the world's
 third largest contributor to
 mismanaged plastic
 wastes with an estimated
 0.75 million tons of plastic
 entering the ocean each year.

**Plastic straws
 can take up to
 200 years
 to decompose.**

Source: World Wildlife
 Foundation
 During this period,
 straws will gradually
 break down into smaller
 particles known as
 microplastics,
 which are present in almost all
 water systems to the world.

**Plastic wastes
 ending up in
 oceans are
 harmful to
 marine life.**

Source: WWF
 Over 1 million marine
 animals are killed each year
 due to plastic pollution in
 the ocean. Turtles often mistake
 plastic for food, while fish ingest
 microplastics unintentionally.

**#REFUSE
 SingleUse
 Be the solution
 to plastic pollution!**

By refusing
 single-use plastics,
 you're doing your part
 in helping reduce the
 amount of plastic wastes
 that find their way to the
 environment.
