**Project Title: Supply and Delivery of Bamboo Propagules**

**Rationale:**

Bamboo is highly valued for its numerous ecological benefits. Its rapid growth, adaptability to diverse environments, and effective prevention of soil and coastal erosion through its extensive root system make it an ideal choice for ecosystem restoration. This project aims to procure propagules of *Kawayan Tinik* (*Bambusa blumeana*) specifically to address soil erosion issues along major riverbanks and waterways within the province.

According to the Bamboo Technoguide by the Department of Agriculture, *Kawayan Tinik* (*Bambusa blumeana*) is the most extensively distributed bamboo species in the Philippines, found almost everywhere except in high elevation areas. Its superior strength, durability, and large culm size make this species highly valuable and useful. It is utilized as raw material for construction, furniture, parquet flooring, concrete reinforcement, kitchen utensils, chopsticks, hats, toys, papermaking, basketry, and farming implements.

**Project Requirements:**

Particulars	Specification	Quantity	Unit
"Kawayan Tinik" ( <i>Bambusa blumeana</i> )	<ul style="list-style-type: none"> <li>Height of at least 2 feet</li> <li>With established root system</li> </ul>	10,000	Propagules

*\*With provision of 5% mortality during transport and hauling*

- The contractor shall provide proof of seedlings supply present in the nursery. To confirm the supply's presence, the Contractor shall have at least twice the required quantity of seedlings.
- The polyethylene (PE) plastic bags containing the seedlings shall be pre-punched

**Schedule of Requirements:**

- Delivery within Thirty (45) days upon receipt of the Notice to Proceed

*"We do not inherit the Earth from our ancestors,  
 we borrow it from our children."*
